COMMISSION IMPLEMENTING REGULATION (EU) .../...

of **XXX**

concerning the authorisation of a new use of the preparation of *Bacillus subtilis* DSM 29784 as a feed additive for chickens for fattening and chickens reared for laying (holder of authorisation ADISSEO France SAS)

(Text with EEA relevance)

COMMISSION IMPLEMENTING REGULATION (EU) .../...

of **XXX**

concerning the authorisation of a new use of the preparation of *Bacillus subtilis* DSM 29784 as a feed additive for chickens for fattening and chickens reared for laying (holder of authorisation ADISSEO France SAS)

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1831/2003 of the European Parliament and of the Council of 22 September 2003 on additives for use in animal nutrition¹, and in particular Article 9(2) thereof,

Whereas:

- (1) Regulation (EC) No 1831/2003 provides for the authorisation of additives for use in animal nutrition and for the grounds and procedures for granting such authorisation.
- (2) In accordance with Article 7 of Regulation (EC) No 1831/2003, an application was submitted for the authorisation of a preparation of *Bacillus subtilis* DSM 29784. That application was accompanied by the particulars and documents required under Article 7(3) of Regulation (EC) No 1831/2003.
- (3) The application concerns the authorisation of a preparation of *Bacillus subtilis* DSM 29784 as a feed additive for chickens for fattening and chickens reared for laying, to be classified in the additive category “zootechnical additives”.
- (4) The European Food Safety Authority ('the Authority') concluded in its opinion of 4 July 2017² that, under the proposed conditions of use, the preparation of *Bacillus subtilis* DSM 29784 does not have an adverse effect on animal health, human health and the environment. The Authority also concluded that the preparation concerned has the potential to improve the zootechnical performance of chickens for fattening. This conclusion can be extended to chickens reared for laying when used at the same dose. The Authority does not consider that there is a need for specific requirements of post-market monitoring. It also verified the report on the method of analysis of the feed additive in feed submitted by the Reference Laboratory set up by Regulation (EC) No 1831/2003.
- (5) The assessment of the preparation of *Bacillus subtilis* DSM 29784 shows that the conditions for authorisation, as provided for in Article 5 of Regulation (EC) No 1831/2003, are satisfied. Accordingly, the use of that preparation should be authorised as specified in the Annex to this Regulation.
- (6) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

¹ OJ L 268, 18.10.2003, p. 29.

² EFSA Journal 2017; 15(7):4933.

HAS ADOPTED THIS REGULATION:

Article 1

The preparation specified in the Annex, belonging to the additive category 'zootechnical additives' and to the functional group "gut flora stabilisers", is authorised as an additive in animal nutrition subject to the conditions laid down in that Annex.

Article 2

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels,

For the Commission
The President
Jean-Claude JUNCKER
