(*) Limit of analytical determination
(a) For the complete list of products of plant and animal origin to which MRLs apply, reference should be made to Annex I.

Chlormequat (sum of chlormequat and its salts, expressed as chlormequat-chloride)

(+) Recent monitoring data show that chlormequat levels in pears are declining but still occur at levels above the limit of determination due to former uses. It is therefore appropriate to set a temporary MRL at a value of 0.07 mg/kg pending the submission of further monitoring data. When reviewing the MRL, the Commission will take into account the information, if it is submitted by 13 April 2021, or, if that information is not submitted by that date, the lack of it.

0130020 Pears

(+) The following MRL applies to oyster mushrooms: 6 mg/kg. Monitoring show that cross-contamination of untreated cultivated fungi may occur with straw lawfully treated with chlormequat. When reviewing the MRL, the Commission will take into account the information, if it is submitted by 13 April 2021, or, if that information is not submitted by that date, the lack of it.

Code number	Groups and examples of individual products to which the MRLs apply (a)	Chloromequat (sum of chloromequat and its salts, expressed as chloromequat-chloride)
-------------	--	--

0280010 Cultivated fungi

(+) The European Food Safety Authority identified some information on crop metabolism as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 13 April 2019, or, if that information is not submitted by that date, the lack of it.
