

ANNEX

Identi- fication number of the additive	Additive	Composition, chemical formula, description, analytical method	Species or category of animal	Maximum age	Minimum content	Maximum content	Other provisions	End of period of authorisa- tion
					mg/kg of complete feedingstuff with a moisture content of 12 %			
Category of technological additives. Functional group: acidity regulators								
1j001	Potassium diformate	Additive composition: Potassium diformate ≥ 98% ----- Characterisation of the active substance: Potassium diformate CAS No: 20642-05-1 EINECS No: 243-934-6 C ₂ H ₃ O ₄ K ----- Analytical method¹: For the determination of potassium diformate (as total formic acid) in the feed additive, premixture, feedingstuffs: – Ion chromatography with conductivity detection (IC-CD) - EN 17294; For the determination of potassium in the feed additive:	Pigs for fattening Weaned piglets	-	-	6 000	<div>1. In the directions for use of the additive and premixtures, the storage conditions shall be indicated.</div> <div>2. The maximum content of potassium diformate shall be 6000 mg/kg of complete feedingstuff with a moisture content of 12%, whether used alone as an acidity regulator or used in combination with other sources of potassium.</div> <div>3. For users of the additive and premixtures, feed business operators shall establish operational procedures and organisational measures to address potential risks resulting from its use. Where those risks cannot be eliminated or reduced to a minimum by such procedures and measures, the additive and premixtures shall be used with personal protective equipment,</div>	<i>[10 years from the date of entry into force of this Regulation. To be completed by the OP]</i>

¹ Details of the analytical methods are available at the following address of the Reference Laboratory: <https://ec.europa.eu/jrc/en/eurl/feed-additives/evaluation-reports>.
