

## ANNEX

Identi- fication number of the feed additive	Additive	Composition, chemical formula, description, analytical method	Species or category of animal	Maximum age	Minimum content	Maximum content	Other provisions	End of period of authorisa- tion
					CFU/kg of fresh material			
Category: technological additives. Functional group: silage additives								
1k20763	<i>Lactiplantibacillus plantarum</i> DSM 34271	<b>Additive composition</b> Preparation of <i>Lactiplantibacillus plantarum</i> DSM 34271 containing a minimum of 4 × 10 <sup>11</sup> CFU/g additive  Solid form ----- <b>Characterisation of the active substance</b> Viable cells of <i>Lactiplantibacillus plantarum</i> DSM 34271 ----- <b>Analytical method<sup>1</sup></b> Enumeration in the feed additive of <i>Lactiplantibacillus plantarum</i> DSM 34271:  - Spread plate (or pour plate) method on MRS agar - EN 15787	All animal species	-	-	-	<ol style="list-style-type: none"><li>1. In the directions for use of the additive and premixtures, the storage conditions shall be indicated.</li><li>2. The additive shall only be used with easy and moderately difficult to ensile fresh plant material<sup>2</sup>.</li><li>3. Minimum dose of the additive when it is not used in combination with other micro- organisms as silage additives: 1x10<sup>8</sup> CFU/kg fresh material.</li><li>4. If used as a cryoprotectant, polyethylene glycol (PEG 4000) shall be used up to a maximum concentration of 0,025 mg/kg silage.</li><li>5. For users of the additive and premixtures, feed business</li></ol>	[10 years from the date of entry into force of this Regulation. To be completed by the OP]

<sup>1</sup> Details of the analytical methods are available at the following address of the Reference Laboratory: [https://joint-research-centre.ec.europa.eu/eurl-fa-eurl-feed-additives/eurl-fa-authorisation/eurl-fa-evaluation-reports\\_en](https://joint-research-centre.ec.europa.eu/eurl-fa-eurl-feed-additives/eurl-fa-authorisation/eurl-fa-evaluation-reports_en).

<sup>2</sup> Easy to ensile forage: > 3 % soluble carbohydrates in fresh material; moderately difficult to ensile forage: 1,5-3,0 % soluble carbohydrates in the fresh material in accordance with Commission Regulation (EC) No 429/2008 of 25 April 2008 on detailed rules for the implementation of Regulation (EC) No 1831/2003 of the European Parliament and of the Council as regards the preparation and the presentation of applications and the assessment and the authorisation of feed additives (OJ L 133, 22.5.2008, p. 1).

		Identification of <i>Lactiplantibacillus plantarum</i> DSM 34271:  - Pulsed Field Gel Electrophoresis (PFGE) - CEN/TS 17697 or DNA sequencing methods					operators shall establish operational procedures and organisational measures to address potential risks resulting from their use. Where those risks cannot be eliminated by such procedures and measures, the additive and premixtures shall be used with personal skin, eye and breathing protective equipment.
