COMMISSION IMPLEMENTING REGULATION (EU) .../...

of **XXX**

concerning the authorisation of a preparation of *Lactiplantibacillus plantarum* NCIMB 41028 and a preparation of *Lactiplantibacillus plantarum* NCIMB 30148 as feed additives for all animal species

(Text with EEA relevance)

COMMISSION IMPLEMENTING REGULATION (EU) .../...

of XXX

concerning the authorisation of a preparation of *Lactiplantibacillus plantarum* NCIMB 41028 and a preparation of *Lactiplantibacillus plantarum* NCIMB 30148 as feed additives for all animal species

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1831/2003 of the European Parliament and of the Council of 22 September 2003 on additives for use in animal nutrition¹, and in particular Article 9(2) thereof,

Whereas:

- (1) Regulation (EC) No 1831/2003 provides for the authorisation of additives for use in animal nutrition and for the grounds and procedures for granting such authorisation.
- (2) In accordance with Article 7 of Regulation (EC) No 1831/2003, two applications were submitted for the authorisation of a preparation of *Lactiplantibacillus plantarum* NCIMB 41028 and a preparation of *Lactiplantibacillus plantarum* NCIMB 30148. Those applications were accompanied by the particulars and documents required under Article 7(3) of Regulation (EC) No 1831/2003.
- (3) The applications concern the authorisation of the preparation of *Lactiplantibacillus plantarum* NCIMB 41028 and the preparation of *Lactiplantibacillus plantarum* NCIMB 30148 as feed additives for all animal species, requesting those additives to be classified in the category ‘technological additives’ and in the functional group ‘silage additives’.
- (4) The European Food Safety Authority (‘the Authority’) concluded in its opinions of 26 November 2024² that the use of the preparations of *Lactiplantibacillus plantarum* NCIMB 41028 and of *Lactiplantibacillus plantarum* NCIMB 30148 is safe for all animal species, consumers and the environment. It also concluded that the additives are not irritant to skin, they should be considered as potential skin and respiratory sensitisers, that any exposure through skin and respiratory tract to those additives is to be considered a risk and could not conclude on their eye irritation potential. The Authority further concluded that the addition of *Lactiplantibacillus plantarum* NCIMB 41028 and of *Lactiplantibacillus plantarum* NCIMB 30148 at a minimum level of 1×10^9 CFU/kg fresh plant material has the potential to improve the production of silage from fresh material.

EFSA Journal, 22(12), e9143. <https://doi.org/10.2903/j.efsa.2024.9143>.

- (5) In view of the above, the Commission considers that the preparations of *Lactiplantibacillus plantarum* NCIMB 41028 and of *Lactiplantibacillus plantarum* NCIMB 30148 satisfy the conditions provided for in Article 5 of Regulation (EC) No 1831/2003. Accordingly, the use of those preparations should be authorised. In addition, the Commission considers that appropriate protective measures should be taken to prevent adverse effects on the health of the users of the additives.
- (6) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

Article 1
Authorisation

The preparations specified in the Annex, belonging to the additive category ‘technological additives’ and to the functional group ‘silage additives’, are authorised as additives in animal nutrition, subject to the conditions laid down in that Annex.

Article 2
Entry into force

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels,

For the Commission
The President
Ursula VON DER LEYEN
