THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1829/2003 of the European Parliament and the Council of 22 September 2003 on genetically modified food and feed¹, and in particular Article 8(6) and Article 20(6) thereof,

Whereas:

- (1) Commission Decisions 2007/305/EC², 2007/306/EC³ and 2007/307/EC⁴ lay down the rules for the withdrawal from the market of Ms1xRf1 (ACS-BNØØ4-7xACS-BNØØ1-4) hybrid oilseed rape, Ms1xRf2 (ACS-BNØØ4-7xACS-BNØØ2-5) hybrid oilseed rape and Topas 19/2 (ACS-BNØØ7-1) oilseed rape respectively, as well as their derived products ('GM material').
- (2) Those decisions provided for a transitional period of five years during which food and feed containing, consisting of or produced from the GM material were allowed to be placed on the market in proportion no higher than 0,9% and provided that that presence was adventitious or technically unavoidable. The purpose of the transitional period was to take into account the fact that minute traces of that GM material could sometimes be present in the food and feed chains, even after the authorisation holder, Bayer CropScience AG, stopped selling seeds derived from the genetically modified organisms and measures were taken to avoid the presence of the GM material in food and feed.
- (3) Decisions 2007/305/EC, 2007/306/EC and 2007/307/EC also set out measures that Bayer CropScience AG had to take in order to ensure the effective withdrawal from the market of the GM material and laid down reporting obligations on the addressee.

² Commission Decision 2007/305/EC of 25 April 2007 on the withdrawal from the market of Ms1xRf1 (ACS-BNØØ4-7xACS-BNØØ1-4) hybrid oilseed rape and its derived products (OJ L 117, 5.5.2007, p. 17, ELI: <http://data.europa.eu/eli/dec/2007/305/oj>).

³ Commission Decision 2007/306/EC of 25 April 2007 on the withdrawal from the market of Ms1xRf2 (ACS-BNØØ4-7xACS-BNØØ2-5) hybrid oilseed rape and its derived products (OJ L 117, 5.5.2007, p. 20, ELI <http://data.europa.eu/eli/dec/2007/306/oj>).

⁴ Commission Decision 2007/307/EC of 25 April 2007 on the withdrawal from the market of Topas 19/2 (ACS-BNØØ7-1) oilseed rape and its derived products (OJ L 117, 5.5.2007, p. 23, ELI: <http://data.europa.eu/eli/dec/2007/307/oj>).

- (4) Commission Implementing Decision 2012/69/EU⁵ extended the transitional period until 31 December 2016 and reduced the tolerated presence of the GM material in food and feed to 0,1 % mass fraction. Commission Implementing Decision (EU) 2016/2268⁶ further extended the transition period until 31 December 2019, Commission Implementing Decision (EU) 2019/1562⁷ until 31 December 2022 and Commission Implementing Decision (EU) 2022/736⁸ until 31 December 2025.
- (5) Commission Implementing Decision (EU) 2019/1117⁹ amended Decisions 2007/305/EC, 2007/306/EC and 2007/307/EC as regards the addressee, from Bayer CropScience AG to BASF SE.
- (6) In November 2024, BASF Belgian Coordination Center CommV, a branch of BASF SE, reported that despite the measures taken, minute traces of the GM material had still been detected, in a further decreasing trend, in oilseed rape commodities in recent years. Such persisting presence of those traces could be explained by the biology of oilseed rapes, since seeds can remain dormant for long periods, as well as by farm practices which have been employed to harvest the seeds and which may have resulted in accidental spillage, the level of which was difficult to estimate at the time of adoption of Decisions 2007/305/EC, 2007/306/EC and 2007/307/EC, and Implementing Decisions 2012/69/EU, (EU) 2016/2268, (EU) 2019/1562 and (EU) 2022/736.
- (7) Against this background, it is appropriate to extend the transitional period until 31 December 2028 to allow for the further decrease of the remaining traces of the GM material in the food and feed chains. In order to allow the Commission to reassess the situation before that date, BASF SE should report to the Commission on the implementation of the in-house programme required pursuant to Decisions 2007/305/EC, 2007/306/EC and 2007/307/EC and on the gathered information concerning the presence of the GM material in oilseed rape commodities imported into the Union from Canada, the only country where the GM material was cultivated for commercial purposes.
- (8) BASF SE should continue to ensure the continued availability of reference materials to enable control laboratories to perform their analysis during the transitional period.
