

ANNEX

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

Identi- fication number of the feed additive	Name of the Additive	Composition, chemical formula, description, analytical method	Species or category of animal	Maxi- mum age	Minimum content	Maximum content	Other provisions	End of period of authorisa- tion
					mg of the additive /kg of complete feedingstuff with a moisture content of 12%			
Category: sensory additives. Functional group: flavouring compounds								
2b13010	4-hydroxy– 2,5- dimethylfuran- 3(2H)-one	Additive composition 4-Hydroxy-2,5-dimethylfuran-3 (2H)-one Characterisation of active substance 4-Hydroxy-2,5-dimethylfuran-3 (2H)-one Produced by chemical synthesis Purity: 98 % Chemical formula: C ₆ H ₈ O ₃ CAS number: 3658-77-3 FLAVIS: 13.010	All animal species except cats and dogs	-	-		<div>1. The additive shall be incorporated into the feed in the form of a premixture.</div> <div>2. In the directions for use of the additive and premixtures, the storage conditions and stability to heat treatment shall be indicated.</div> <div>3. On the label of the additive the following shall be indicated: ‘Recommended maximum content of the active substance per kg of complete feedingstuff with a moisture content of 12 %:</div>	<i>[10 years from the date of entry into force of this Regulation. To be completed by the OP]</i>

Identi- fication number of the feed additive	Name of the Additive	Composition, chemical formula, description, analytical method	Species or category of animal	Maxi mum age	Minimum content	Maximum content	Other provisions	End of period of authorisa- tion
					mg of the additive /kg of complete feedingstuff with a moisture content of 12%

		Analytical method¹ For the identification of the additive in mixtures of flavourings: — Gas chromatography mass spectrometry with retention time locking GC-MS-RTL.					<div>— all animal species except cats and dogs: 10 mg’</div> <div>4. The functional group, the identification number, the name and the added amount of the active substance shall be indicated on the label of the premixture where the use level on the label of the premixture would result in exceeding the level referred to in point 3.</div> <div>5. For users of the additive and premixtures, feed business operators shall establish operational procedures and organisational measures to address potential risks by inhalation, dermal contact or eyes contact. Where those risks cannot be eliminated by such procedures and measures, the additive and</div>	

¹Details of the analytical methods are available at the following address of the Reference Laboratory: https://joint-research-centre.ec.europa.eu/eurl-fa-eurl-feed-additives/eurl-fa-authorisation/eurl-fa-evaluation-reports_en.
